

OUTDOOR SUBSTATIONS

Federal Pacific through its sister company Line Power Custom Solutions offers Portable Electrical Substations. These substations give operators the advantage of mobility and ease of installation. In many instances, these substations have been de-energized, moved and re-energized in one day, allowing minimum down time during the move from one location to another. All substations are custom designed to meet the customer's needs. They may have one or two high-voltage outputs to feed separate circuits and as many low-voltage outputs as are required to provide surface power. Some may also include starters to operate motors and fans or a 120/240 volt utility circuit for an office or supply building.

Federal Pacific can offer portable and permanent electrical substations and switchgear for all types of applications. Our capability, gained through many years of experience, extends from small pump substations to large multi-skid power substations with walk-in switchgear and to trailer-mounted substations. Each substation, whether skid-mounted, fixed, or trailer-mounted is individually designed by combining the customer's special requirements with Federal Pacific's heavy-duty construction and attention to detail.

If you are considering new electrical equipment, contact your local Federal Pacific territory manager, manufacturer's representative or call our factory.
